Value for Money:

Likelihood to Recommend:

Comments:

The program is self-explanatory and easy to understand.

Pros:

They are on top of any concerns we've come across and the product works very well.

Cons:

We had to do some figuring out of our own with certain things. Things were specified that would be included but not enough to where they wouldn't be specified right away.

Recommendations:

Do your research! I researched for 3-4 months for our small company. Giving the fact that we hadn't changed our ERP Software in 30+ years it was a very drastic but necessary change. We are happy to be moving forward with the times and with all of our information being in 1 place, instead of 2 or more.
